GLENANTH, BARON ULRICH FREIHERR VON

Second secretary at the German Embassy in Washington in 1941; played an important part in the Intelligence work done by the German consulates in U.S.; his field was that of education and propaganda; he had to report on moral influences of different groups in order to ascertain who might be considered as a bridge in educational and religious feelings between Germany and U.S.; all German exchange students in U.S. were required to report to him and of course they told him of feelings of their professors and fellow students toward Germany.
